## About

VGOD is proud to bring you the all new Elite Series Mechanical Mod. Featuring an innovative flare grip designed chassis and Elite Series VGOD Shield logo. This device offers an original stylish design that not only looks good but is hard hitting, offers improved handling as well as ergonomic comfort. Its appeal will cater to all tricksters, cloud chasers and flavor cravers.

## What's inside

- 1 x VGOD Elite Series Mechanical Mod
- 1 x Carry Case
- 1 x User Manual
- 1 x Spare Spring

## Operations

1. Power the device by pressing the Battery Switch button inwards, located at the bottom of the mod.
2. Cease power by releasing the Battery Switch Button.

## Installing batteries

The VGOD Elite Series Mechanical Mod features bottom mounted Battery Switch that is removable for access to the battery compartment.

1. Rotate the Battery Switch to the left to remove.
2. Place a single 18650 battery, positive side first, to seat just below the 510 hybrid connection. The negative side of the battery will come in contact with the Battery Switch Contact, located at the bottom of the mod.
3. Replace Battery Switch by placing it on the bottom of the mod, threaded side in, and rotate to the right until closed. Do not overtighten.

## Attaching atomizer

When attaching an atomizer to your Elite Series Mechanical Mod, double check the cleanliness of your threads. NOTE: Be sure that all atomizers used have a protruding 510 pin below the threads of the atomizer.

1. Attach your atomizer to the device making sure it is not too tight. This will prevent circular scratches and to prevent stress on your 510 pin.
2. Sub-ohm style tank with coils rated under 100 watts should not be used with this device.
3. Press Battery Switch button, begin to vape, and enjoy.

## Protection

VGOD is dedicated to the safety of our customers and will design in features that mitigate the probability of error.

Features:

1. Plastic lined battery housing.
2. Auto-adjust battery fit

## Warnings

1. Hybrid 510 atomizer connection. Only use atomizers that have a protruding 510 pin, below the threads of the atomizer.
2. Do not use sub-ohm style tank with coils rated under 100 watts.
3. Keep the device away from high temperature and humidity.
4. Remove the battery from the device when it's not used for a long time.
5. Keep the device away from children, minors, and pets.
6. Ensure the batteries used in the device are at least 35Amp, and the insulation wrap is not damaged.
